USER INTERFACE AND DESIGN

EXPERIMENT – 1

CHUNKING

Roll No : 240701505

Name : N.R.Shreya Amudhu

Title:

Design a UI where users recall app icons and evaluate the effect of chunking on user memory

FRAME 1: INSTRUCTION PAGE

Chunking Analysis of the Instruction Page The instruction page applies chunking effectively to organize information into meaningful units, making it easier to understand the task:

- Clear and Sequential Steps: Instructions are presented in a numbered format with six simple steps.
- Reduced Cognitive Overload: Each step conveys one action, preventing confusion.
- Visual Hierarchy: A bold title "APP ICON MEMORY TASK" clearly communicates the purpose.
- Clarity: The "START" button is visually highlighted to guide users to the next step.

FRAME 2: CHUNKING PHASE (MEMORIZATION SCREEN)

Analysis of the Chunking Phase This screen represents the memory encoding stage, where users observe and memorize app icons using chunking.

- Countdown Timer (00:05): The red circle indicates a limited viewing time of 5 seconds to increase focus.
- Grouped App Icons: Icons are categorized into three distinct "chunks": Games, Payment, and Entertainment.
- Cognitive Benefits: By identifying categories instead of individual icons, users reduce their memory load and improve short-term retention.
-

FRAME 3: RECALL PHASE (SELECTION SCREEN)

Analysis of the Recall Phase This screen represents the memory retrieval stage, where users recall and select the app icons they remember.

- Grid of App Icons: This includes previously shown icons (like Facebook and Spotify) and distractor icons to test recall accuracy.
- Checkboxes: Users make selections via checkboxes located directly under each icon.
- Submit Button: A prominent button confirms the user's final response.
-

FRAME 4: RESULT PAGE

Analysis of the Result & Feedback Screen This screen provides immediate feedback on the user’s performance.

- Score Display: Shows the user's performance, such as "7/9 Correct".
- Feedback Message: Includes text like "Improved recall" to indicate the effectiveness of the chunking strategy.
- Action Buttons: Includes RESTART to retake the task and EXIT to end the experiment.
-
