| **Tool:** Dia Diagram Editor | |

## AIM

The aim is to perform task analysis for an online shopping app, document user flows, and create corresponding wireframes using Dia Diagram Editor.

## TOOL

**Dia Diagram Editor –** http://dia-installer.de/

## PROCEDURE

### Step 1: Install Dia

1. Download Dia from the official website: http://dia-installer.de/
2. Install Dia on your computer.
3. Launch the Dia application.

### Step 2: Create New Diagram

1. Go to File → New Diagram.
2. Select Flowchart as the diagram type.

### Step 3: Add Shapes

Use the shape tools (rectangles, ellipses, etc.) to create wireframes for each screen:

- Home Page – Rectangle
- Product Categories – Rectangle
- Product Listings – Rectangle
- Product Details – Rectangle
- Cart – Rectangle
- Checkout – Rectangle
- Order Confirmation – Rectangle
- Order History – Rectangle

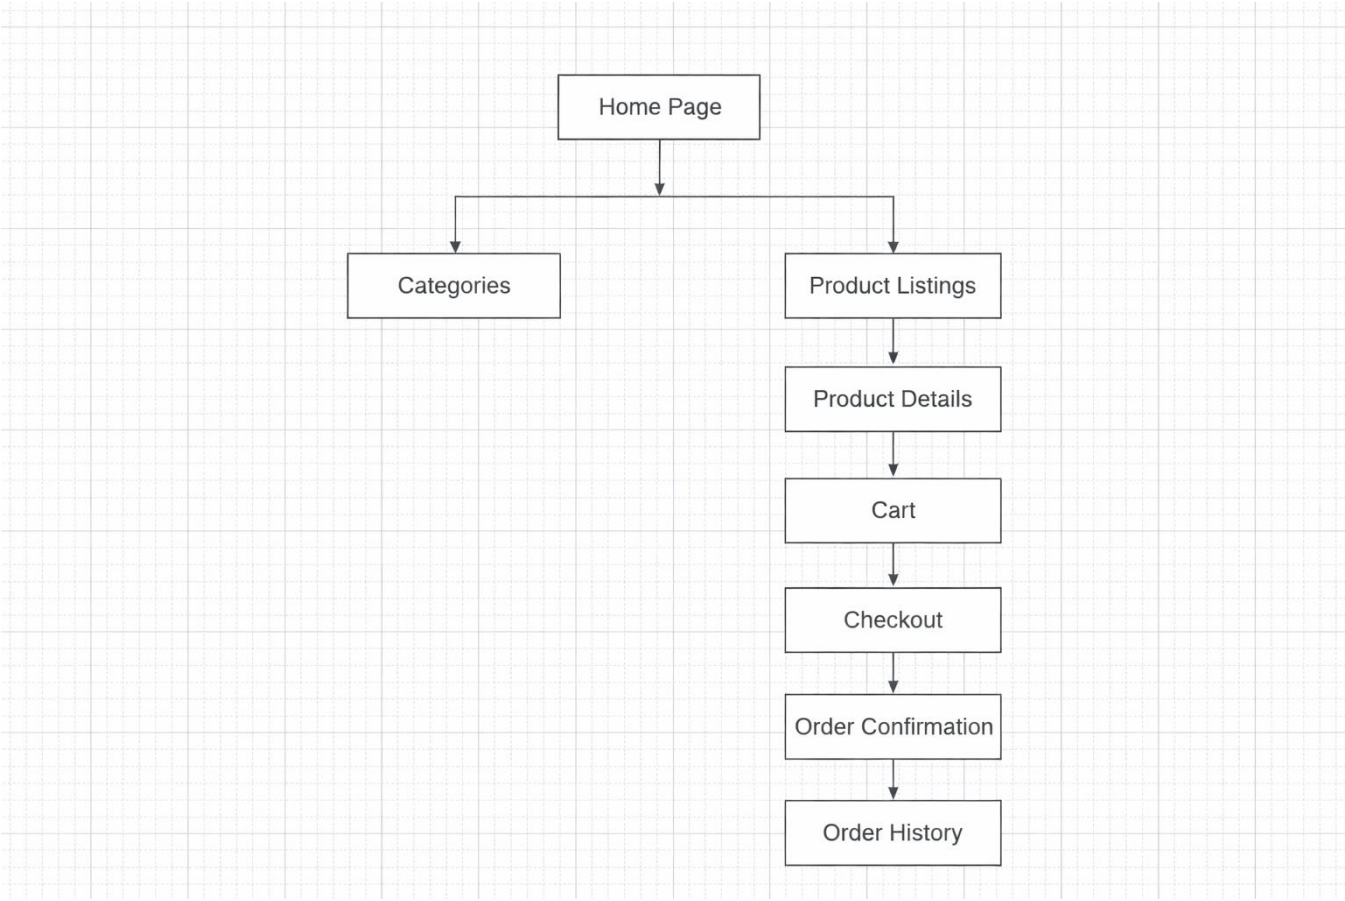
### Step 4: Connect Shapes

Use the line tool to connect shapes, representing the user flows:

### Step 5: Label Shapes

Double-click on each shape to add labels:

- "Home Page" – Landing screen with categories and featured products
- "Categories" – Browse by product type
- "Product Listings" – Grid/list of products with filters
- "Product Details" – Individual product view with Add to Cart
- "Cart" – Review selected items
- "Checkout" – Enter shipping and payment info
- "Order Confirmation" – Summary of placed order
- "Order History" – Track and view past orders

### Step 6: Save the Diagram


1. Go to File → Save As.
2. Save the diagram with a meaningful name, such as "Online Shopping App User Flows".
